

IMPORTANT ANNOUNCEMENT: Based on requests from licensees and to expedite the process of obtaining the most recent license, the Department of Insurance (DOI) is offering several enhancements to eServices.

Effective July 16, 2010, licensees will be able to print license certificates and pocket identification cards through their eServices accounts. There is no charge for this service. Licenses and cards will no longer be mailed by DOI after this date and must be obtained through eServices.

These printed documents are the property of the Commonwealth of Kentucky and must not be altered.

The "Replacement or Additional License Request (Form 8306)" option has been removed from eServices. Once you have logged in to your account, you should click on "Print Licenses and ID Cards" under the menu. On the next screen, you will be able to select any of your current active licenses (such as agent, independent adjuster, life and health consultant, etc.). In addition, you will be able to print an identification card from that screen.

If you do not have an eServices account, please go to <http://insurance.ky.gov> and click on eServices in the top right corner. Click on "First Time Here?" under the log in box to set up your secure account.

Reminder: When you access your eServices account, please be sure the mailing and e-mail addresses have been updated.
